HTML

I know a lot about html.. HTML Forms, HTML Graphics, HTML Media, HTML APIs and other I know everything very well.

CSS

I know a lot about css as well as html..I have studied css very deeply.

- i know everything from basics to advanced topics in css.
- so even without bootstrap framework I can make a website very responsive
- I also know the concept of flexbox very well..
- not only that I also know the concept of grid very well.
- I have studied well about animations in css..that means I can do 2d animation and 3d animation very well.
- As for the css, I will not copy the code anywhere.

JAVASCRIPT

I haven't studied javascript thoroughly but I know enough about it...such as Variables, Operators, Data Types, Functions, Objects, Loops, Eevnts, Js Html Dom, Js Browser Bom and Others

Bootstrap 5.2

As for bootstrap, I have read well about layout, components, utilities, forms and others.

React Js

i currently learning react js..what i know about react js currently,

- * To create and nesting components
- * To add markup and styles, to display data
- * To render conditions and lists
- * To respond to event and update the screen
- * To share data between components
